

JFrame

Observer

Client.View.Login

```
graph BT; ClientViewLogin[Client.View.Login] --> JFrame[JFrame]; ClientViewLogin --> Observer[Observer];
```

The diagram illustrates a class hierarchy where 'Client.View.Login' is a subclass of both 'JFrame' and 'Observer'. This is represented by a box for 'Client.View.Login' at the bottom, with two arrows pointing upwards to boxes for 'JFrame' and 'Observer' at the top. A horizontal line connects the two arrows, and a vertical line descends from its center to the 'Client.View.Login' box.
